

## Online Project Calendar, Instantly Updated

Procore makes it easy to get your project schedule on the web. All of your project team members see an accurate schedule, instead of outdated information. People know what's happening on the job site, every day. Sub-contractors are kept up-to-date on the status of every schedule task, automatically.

Schedule changes can be made in Microsoft Project or one of Primavera's scheduling software products. New schedule information is saved directly into Procore with the click of a button. Sub-contractors can request schedule changes to be made by the authorized project manager. Procore's Schedule Change report provides details on the change history of every task. With Procore, you'll know exactly what happened to every task on your project schedule during the course of a project.

Procore sends out email updates when schedule information gets changed. People who need to know about schedule changes are notified as soon as task details are updated.

## Procore gets up-to-date construction schedules right to your project team, instantly.

### 1. Task Line Items

Every task on the schedule is displayed, along with the project resource responsible.

### 2. Search For Tasks

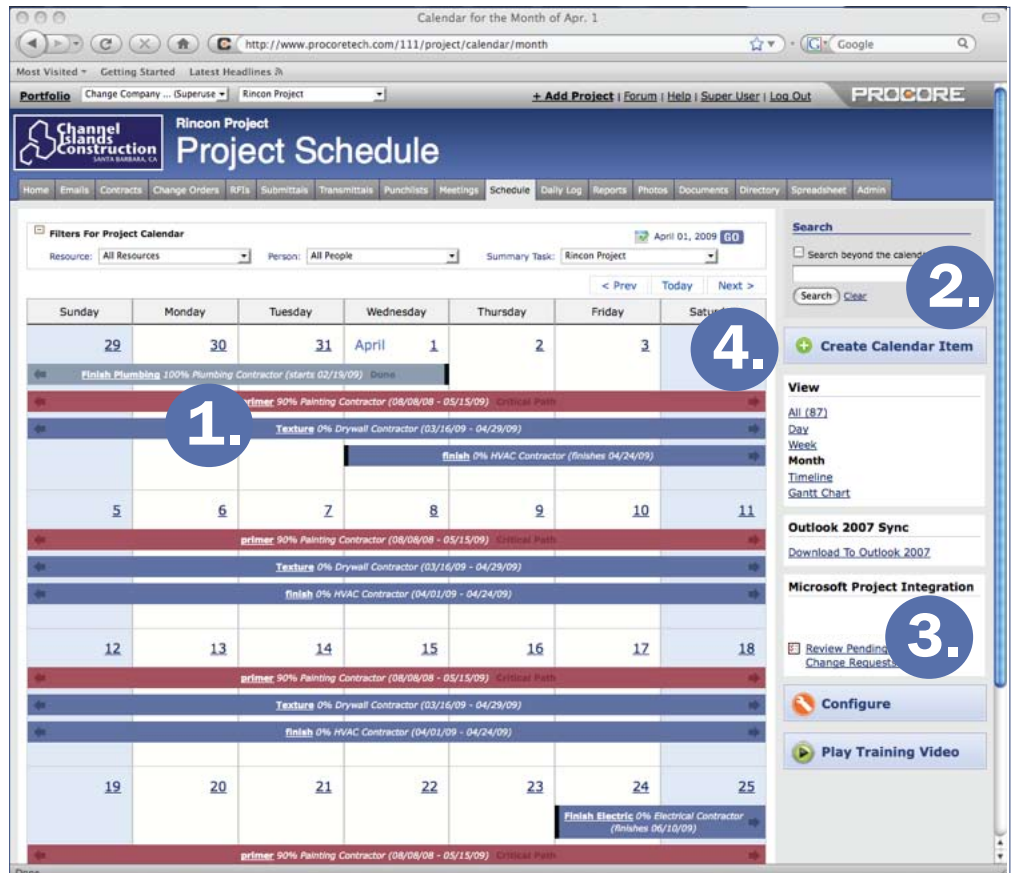

Procore's Search tool makes it easy to find any project task in seconds.

### 3. Works With What You Already Use

Procore works with Microsoft Project, or Primavera's products. Just click to edit your schedule.

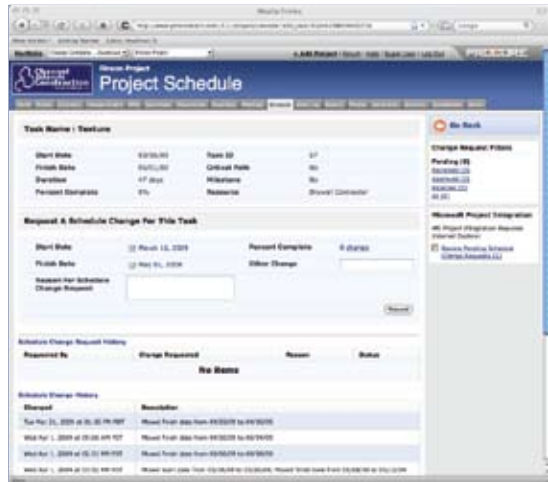

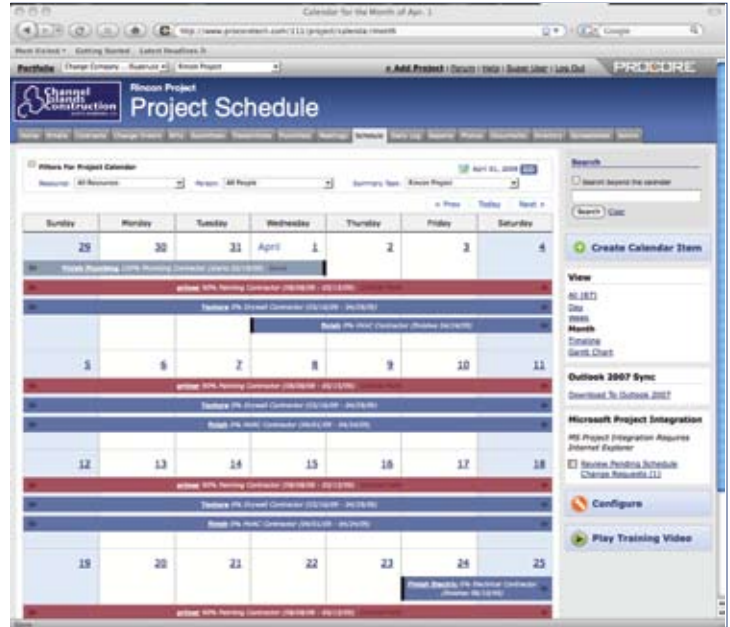

### 4. Instant To-Do Lists

Create to-do items that get added to your online calendar with a single click.

**Procore Makes Scheduling Simple**

Create your project schedule in Microsoft Project or Primavera, and Procore takes over. With a single click, your schedule is uploaded into Procore, where it's available for viewing by any user you authorize. The schedule is displayed in an easy-to-use calendar format. Critical path tasks are marked in red. To-Do items can be added to the schedule, making Procore's online calendar the master source for project information. Schedule updates show up instantly on the web, so team members know that Procore's schedule is always accurate.

**Track The History of Every Schedule Task**

Procore makes it easy to keep schedule tasks up-to-date. Any authorized user can request a schedule change for an individual task. Changes are approved by the project manager or job superintendent. Reasons for each change are collected as the project progresses, and saved in Procore's archive. With Procore, you'll always know what changed on your schedule, and why.

**PROCORE™ Also Includes:**

**Document & Photo Management**

Keep project documents online and backed-up. Plans, permits, contracts, even faxes - they're all safe and accessible.

Click to upload any image file on your computer to Procore. Create your own project categories to organize photos.

**Communications & Collaboration**

A single view for all of your project emails. Project emails from any user flow directly into Procore and are automatically organized by topic.

Procore works with any email system, including MS Outlook, and any device, including laptops and BlackBerry.
